### 2015 Improving Dementia Care in Nursing Homes Conference

May 28th - May 29th, 2015

#### Los Angeles, CA

The Improving Dementia Care in Nursing Homes Conference is the only national conference addressing evidence-based best practices and solutions for improving dementia care to reduce the use of unnecessary anti-psychotic medications and restraint in nursing homes and long term care settings. The conference is supported by The Dementia Society of America, the National Council of Certified Dementia Practitioners and the International Council of Certified Dementia Practitioners, LeadingAge California, and the Lewy Body Dementia Association. The conference format will include National and State updates, clinical case study presentations, interactive panel discussions and more, to help arm the nation's aged care professionals with better tools to provide safer, more innovative and thorough levels of care for those Dementia patients under their care. Register by Fri., Apr. 3<sup>rd</sup> and receive a substantial discount.
