

Alzheimer's Disease & Dementia Care Seminar

Become a Certified Dementia Practitioner
Through the National Council of Certified Dementia Practitioners

September 25, 2014
7:15 a.m. - 3:30 p.m.

Dementia: Facing the Challenge of the Generation

Dementia is defined as a progressive decline that causes deterioration of a person's ability to function.

Knowing the best ways to assist a person who has dementia is important for all caregivers and health care providers.

This seminar provides comprehensive dementia education that will enable participants to better understand the disease, confidently deal with challenging behaviors, and develop a new awareness of, and respect for, those with the diagnosis.

This seminar is open to people wishing to learn more about dementia for personal knowledge, or as a part of their work responsibilities.

This is also the required seminar for those pursuing Certified Dementia Practitioner (CDP) certification. For more information, or to learn how to qualify for certification, please visit the National Council of Certified Dementia Practitioners (NCCDP) www.nccdp.org

A Student Handout Notebook is provided.

Who Should Attend?

Modules Include:

Instructors:
