Dementia Care Specialists

As Certified Dementia Practitioners, we understand how to work with families who care for consumers with dementia. We evaluate the consumer's strengths. We work with the family and medical community to manage medications to manage symptoms. We provide extensive training for our caregivers. We develop dementia program and activities that engages and builds on the strengths of the consumer we are caring for in the home.

What this means to our consumers:

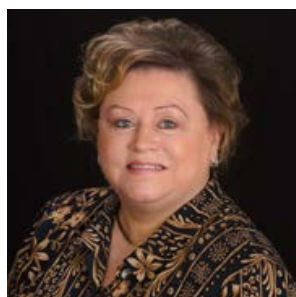

We work to ensure the client is actively engaged with meaningful activities that utilize their strengths, in addition to providing for their safety and physical well being.

We are proud supporters of the Alzheimer's association, including the "Walk to End Alzheimer's" annual event that we helped bring to Monroe County in 2011.

What this means to our consumers:

We understand the depth of difficulty that this form of dementia brings to our community, and can connect you with dementia support groups and Alzheimer's association support services.

Carolyn Jones, RNC, is certified by the American Nurses Credentialing Center (ANCC) and is a member of the American College of Healthcare Executives and the Psychiatric Nurses Association. She holds MSN and MBA degrees from DeSales University in Allentown, where she was inducted into Sigma Theta Tau (the Honor Society of Nursing) and named an Eastern Pennsylvania Healthcare Executive Network (EPAHEN) finalist in Dr. Hal Dolenga's Emerging Leader Award Program. She received her BSN from East Stroudsburg University and also holds a BS in healthcare management. Carolyn is Certified by the National Council of Certified Dementia Practitioners, and Certified as

a Dementia Care Specialist by the NeuroCognitive Institute.
