About Us

Font Size » Large | Small

A little bit about us and what makes Partners in Healthcare unique is that we are a RN designed and managed and accredited private duty home care agency. Our Nurse Care Managers create and most importantly manage a healthcare environment customized to each individual and their families. Partners in Healthcare was founded by Bonnie and Hank Charpentier the owners and operators of this client focused private Home Health Agency. We would be honored to serve you and your family in Seminole, Orange or Osceola counties in Central Florida. Quality care in your home **guaranteed** please call us if we did not meet your expectation!

Bonnie Charpentier, RN, CDP Executive Director of Nursing

Very early in my life, I knew I was a caregiver. Helping others is truly what motivates me. My first job as a nurses aide was in a nursing home, caring for elders. Then I began my professional nursing career as a LPN and gained vast experience in eldercare.

After beginning my family and our sons began school, I decided to continue my education. At this same time, my dad, who had been such a strong supporter and positive influence in my life, was diagnosed with a brain tumor and died a few months later at the young age of fifty-nine. I knew from this personal experience that there had to be a way to keep loved ones with their families during these trying times and hopefully to the end of their lives if that is what they desired. I returned to school and earned a Registered Nurse degree.

Homecare was relatively new and growing in Massachusetts. I knew this was the niche I needed to work, enabling people to remain in their homes. My desire was to provide them with the support and assistance necessary to stay independent for as long as reasonably possible. I am certified by the State of Florida's Department of Elder Affairs as an Alzheimer's trainer. I am certified by the National Council of Certified Dementia Practitioners as a Certified Dementia Practitioner (CDP).

Today, after a multitude of changes, I find my life has come full circle. I am pursuing the same goals I did all those years ago, helping others through RN managed homecare.

Hank Charpentier, MBA, MA Executive Director of Operations

While working, I earned a BS in Business/E-Business, a MBA, a MA in Marketing, and I'm a Certified Senior Advisor (CSA). A few years ago while in transition from my last job of 15 years, my wife expressed an interest in starting her own Home Health Agency. Unsatisfied with the pursuit of technically focused positions, I yearned for more control of my own destiny, and along with my wife, decided to start our own Agency.

I am the Home Health Agency Administrator responsible for all the non-medical aspects of the business. I am excited to go

to work each day, helping others provides the personal satisfaction that I have seldom felt in other positions. As a Navy veteran and member of the American Legion I would be honored to help all vets and their families to develop a care plan that meets their needs.

Danielle Frazier, LPN

Nursing Supervisor

Partners in HealthCare

 815 Orienta Avenue, Suite 1060, Altamonte Springs, FL 32701
