Dealing with Dementia at an Early Age

November 6, 2009

Medical Food for Alzheimer's Disease? I have heard about a medical food that's being marketed and with a bit of research learned it's not a new thing, but being sold to a new and growing market: Alzheimer's patients. Since there are so few things that are effective against most dementing illnesses, it would be a ...

About this blog

Diane Thornton was diagnosed with early onset dementia after several years of medical tests and seeing more than six doctors and specialists. She says that she is living with dementia, not dying from it.
